

PHASE 8 • POCKETSMART AI

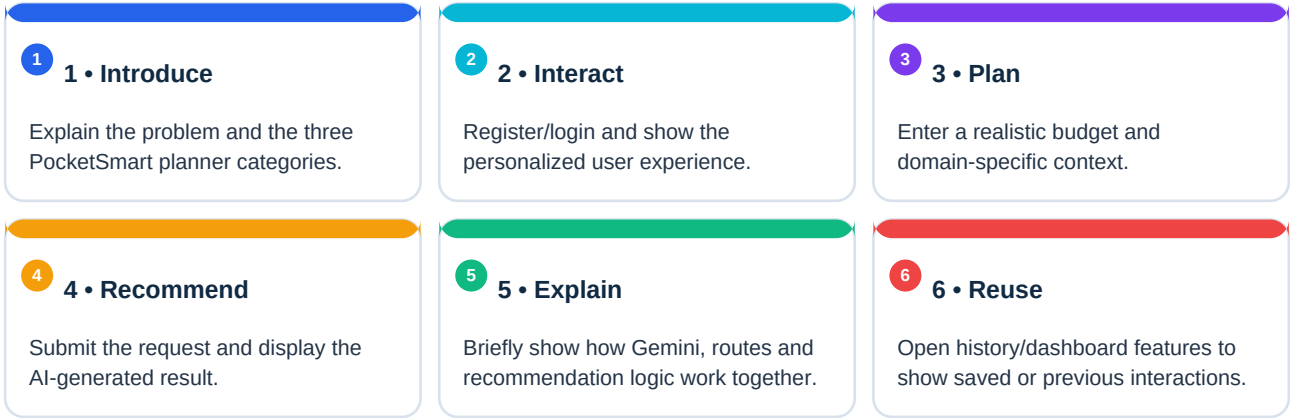

Project Demonstration Phase

Presenting the complete PocketSmart AI journey from login to personalized recommendation.

Project Demonstration Phase

PHASE PURPOSE

The demonstration phase connects every earlier phase into one visible story: a user enters a real planning need, PocketSmart AI interprets it, and the interface presents a budget-aware recommendation.

PROCESS SNAPSHOT

THREE DEMO STORIES

Home Interior	Show room details, quantities, budget and resulting décor/product suggestions.
Party Planning	Show event type, guest count, budget and venue details, followed by food/venue/decor recommendations.
Jewelry	Show budget, occasion and style preferences, optionally add an outfit image, then display coordinated jewelry options.

SUGGESTED SCREEN SEQUENCE

- Home Page → Register/Login → Dashboard → Planner → Recommendation Results → Recommendation History.
- Keep the demo focused on one realistic example per planner instead of trying to show every possible input.
- Use the result screens to explain budget awareness, personalization and the role of AI.

PHASE TAKEAWAY

Demonstration turns the technical project into a clear story that an evaluator can see and understand end-to-end.

Source basis: uploaded PocketSmart AI reference guide. The guide documents the project's planners, architecture, workflow, milestones, development, testing and UI modules. The supplied YouTube link was not directly accessible in this environment, so no unsupported video-specific claims were added.
